NFC Metal Pen

With the integrated NFC TAGS, go beyond haptic advertising and transmit digital information.

PENS

HOW DOES NFC WORK?

Near Field Communication, or NFC, is an international communication standard for the wireless exchange of data over short distances. To transmit data via NFC, the smartphone or tablet is held near a pre-programmed NFC TAG that activates a specific application or function in the device, for example. In the NFC PENS the NFC TAG is located directly beside the NFC logo. This ensures a simple transfer of information to the smartphone or tablet. Connect analogue writing and advertising with the interactive world using inside NFC PENS.

App "NFC TOOLS" available on App Store and Google Play Store.

1. Download and install the NFC TOOLS app.
2. Write the data from the app onto the pen.
3. The pen is ready to be read by the mobile phone.
